STOCKANOMALY.COM

Description:

StockAnomaly.com scans every stock on the NASDAQ, NYSE, OTCBB, TSX, TSXV, LSE, AMEX, ASX, HKEX and SGX every evening after market close in search of abnormal volume or stock price breakouts in lightly traded or non-traded stocks. Their system gathers a list of stocks that meet their criteria based on thresholds. These computer generated stock picks more often than not are positioned for a major upside rally for a buy low, sell high opportunity or a downside rally for a short.

Subscribers are able to monitor potential anomalies before a major price movement. These potential anomalies are an indicator that the stock may move because of insider activity, pre-news activity or investment relations campaigns.

StockAnomaly.com:

- ✓ Scans stocks from global stock exchanges
- ✓ Discovers unusual stock activity in advance
- ✓ Creates custom watchlists
- ✓ Schedules daily email alerts
- ✓ Tracks Potential stock anomalies

This file should work well for all financial and investment offers, online investing, financial, travel, and health publications and magazine and catalog offers.
